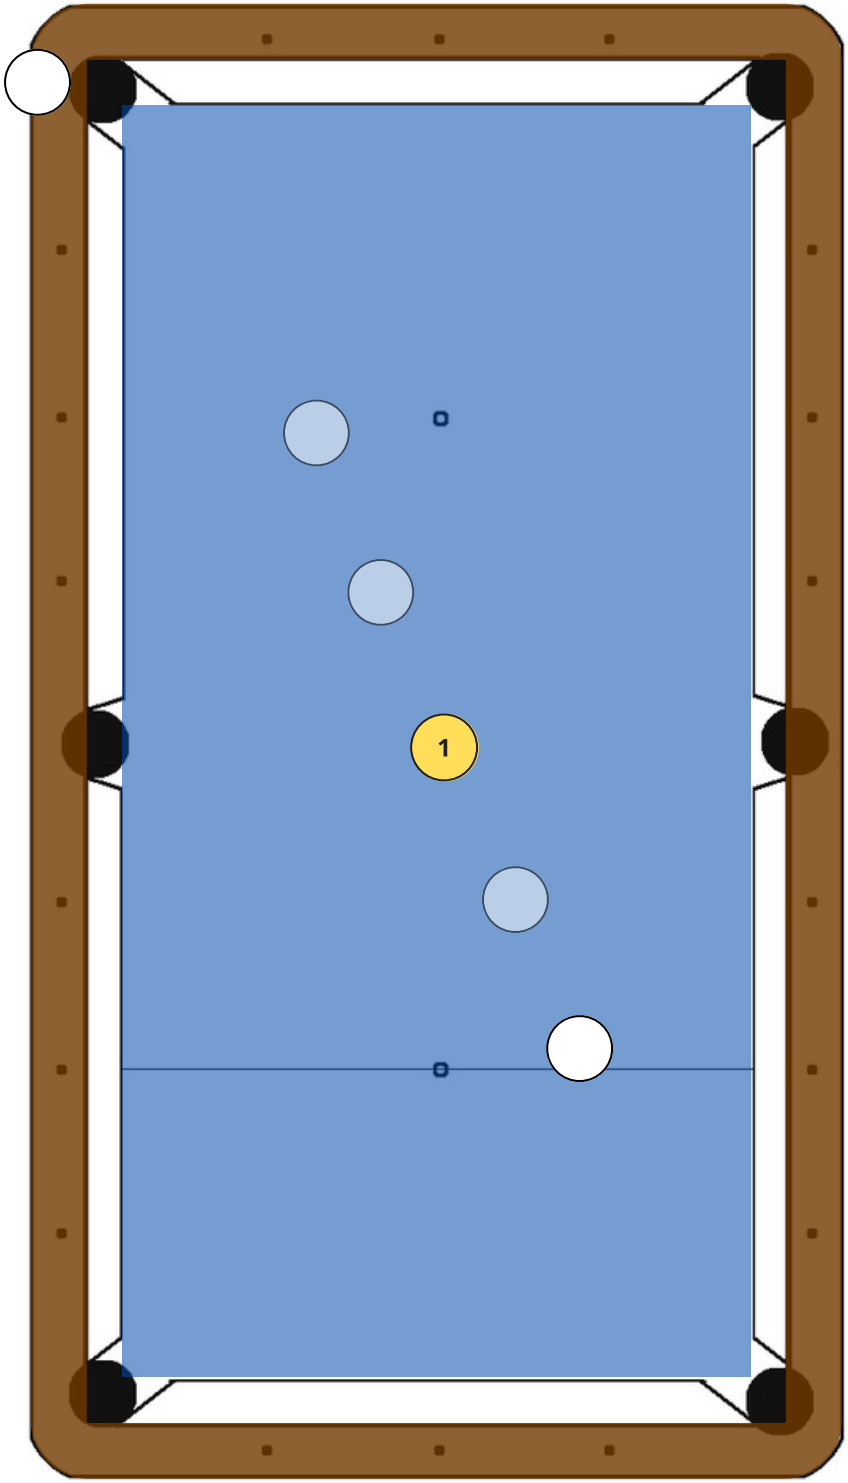
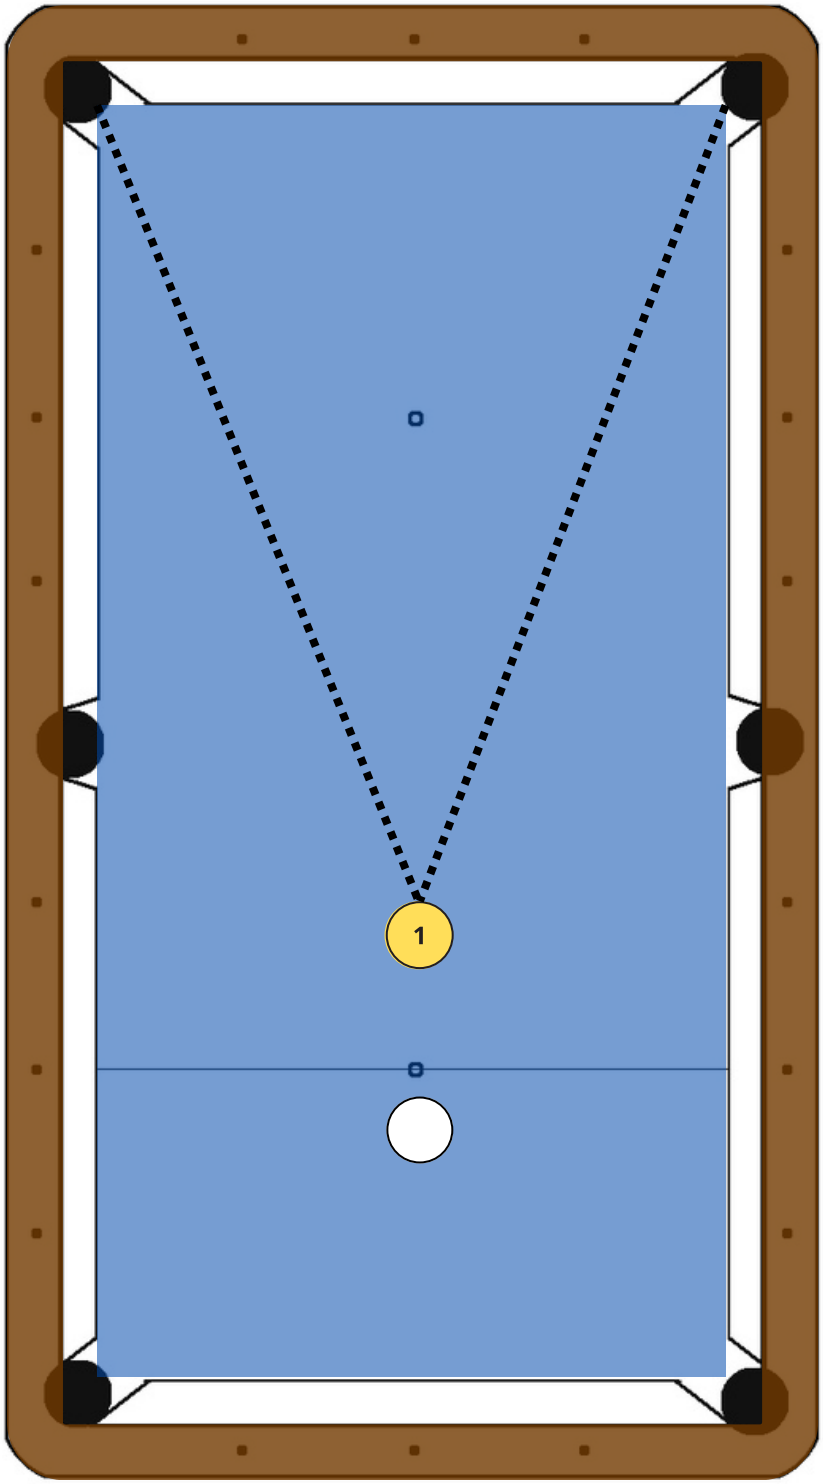
Notes:

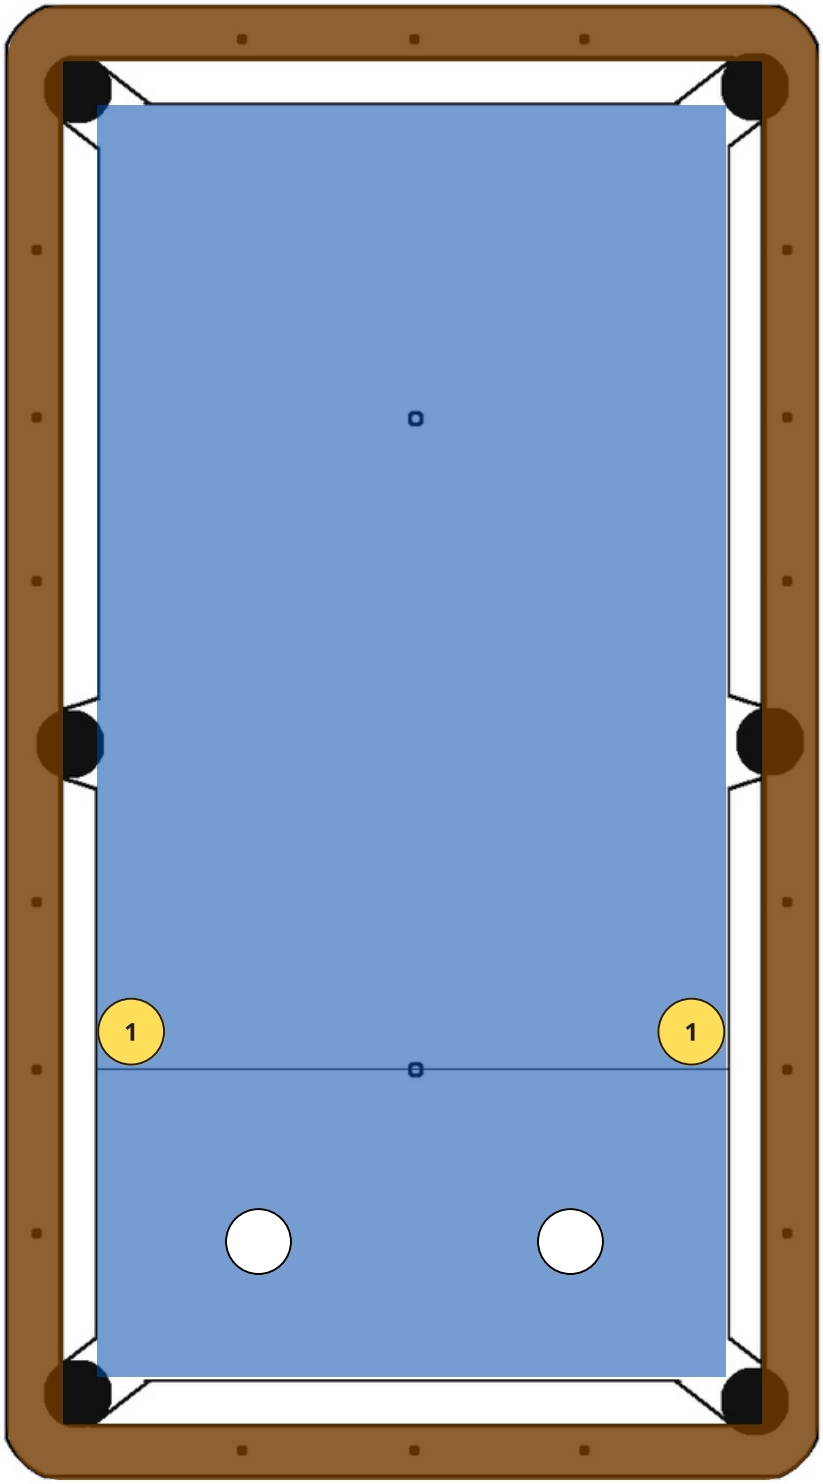
- At all times you start with ball in hand.
- Every time you miss or you touch another ball restart the drill.Focus on staying down and complete the strokes on each and every shot.
- Be aware of what exact english you use each time so you can adapt accordingly.
- Experiment. Adjust your grip, your bridges, your stance and anything else that you think it might help you.
- Always keep notes of how many balls you made each time so you can journal the improvement. Also with this habit you stay accountable and you push yourself more to improve your personal record. It helps your focus too.
- Do not give up. Your goal is to fail as much as possible in the practice so you can fail less in matches.



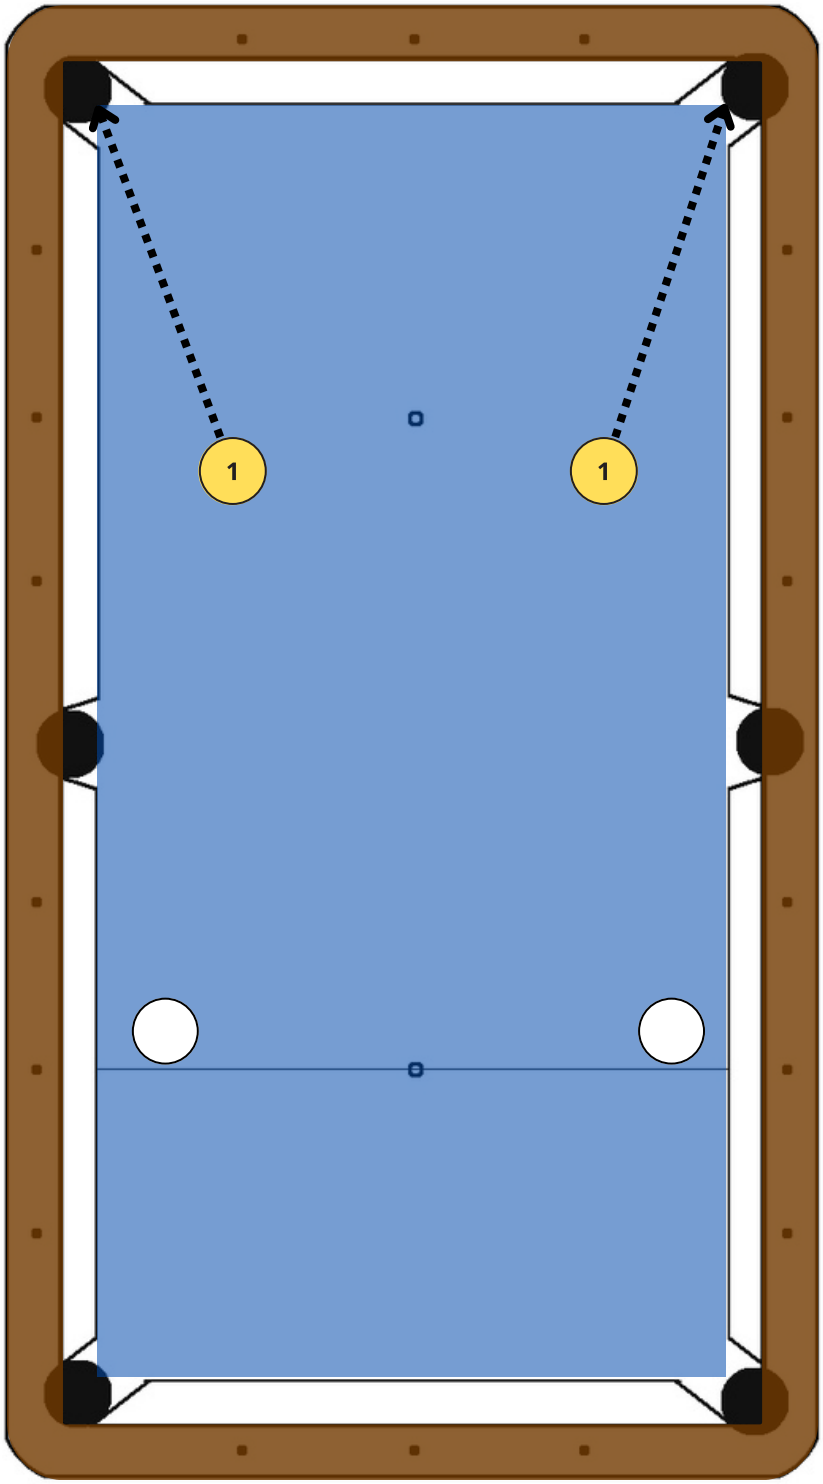
Place the cueball in a straight line from the object ball and try to make the ball with stop, a little follow through so it moves one diamond forward , then two diamonds forward and then the same with draw shot.. Keep score of 10 attempts for each variation.



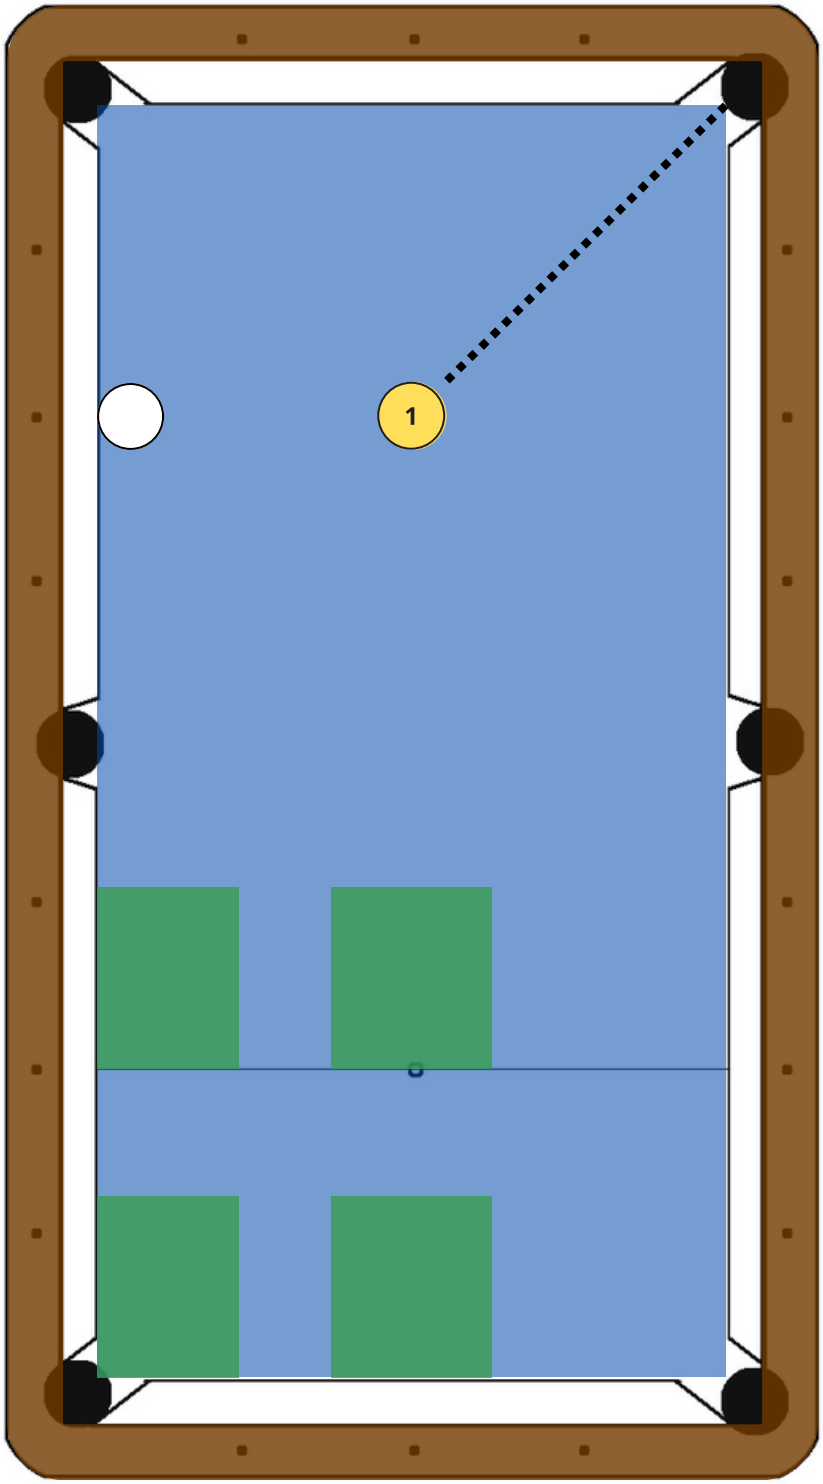
Shoot the ball to both sides. Start with no English and then change to upper, draw, left and right English for both pockets. Keep score of 10 attempts for each variation.



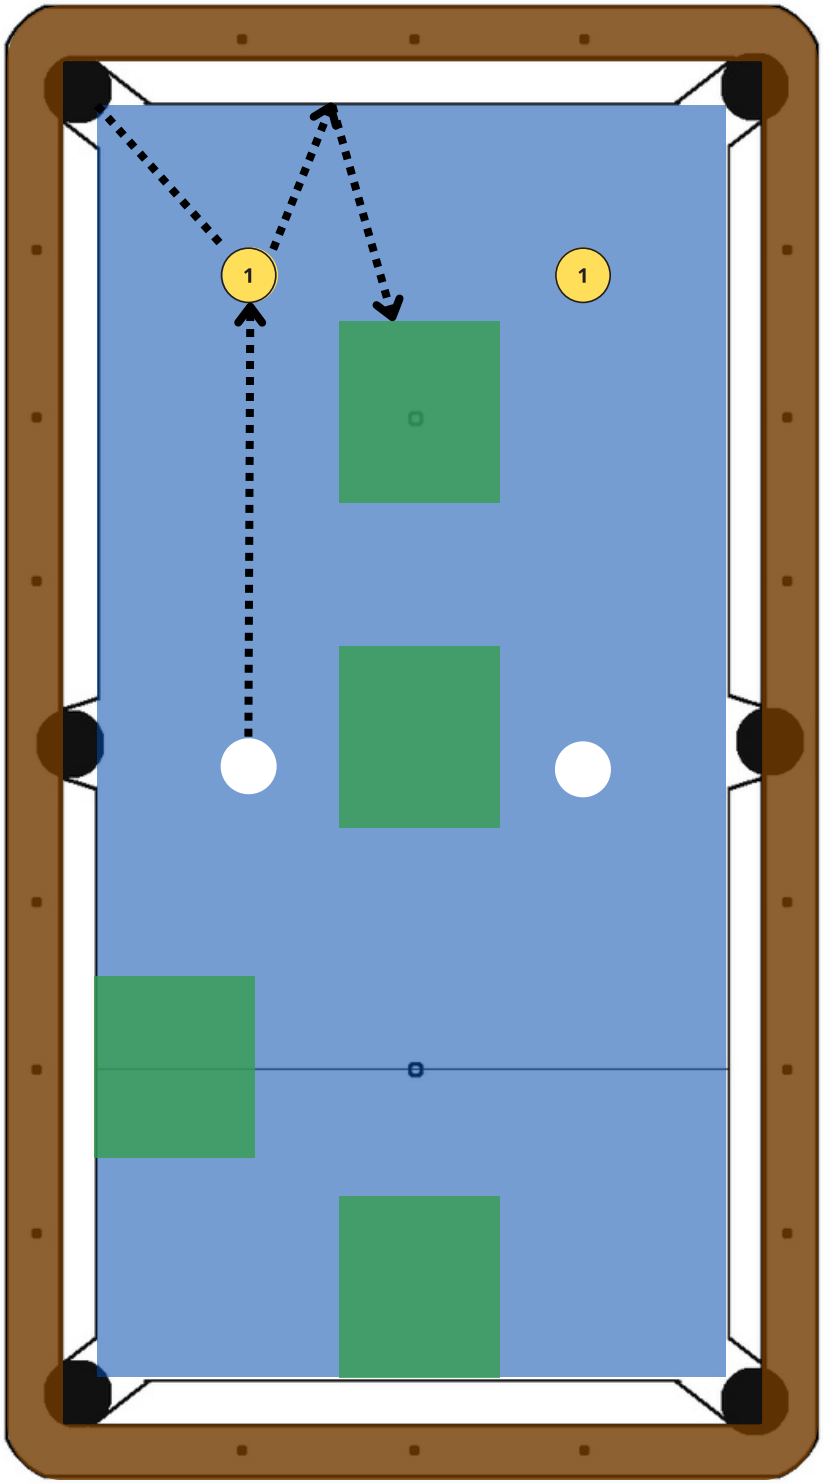
Shoot the ball to both sides. Start with no English and then change to upper, draw, left and right English. Keep score of 10 attempts for each variation.



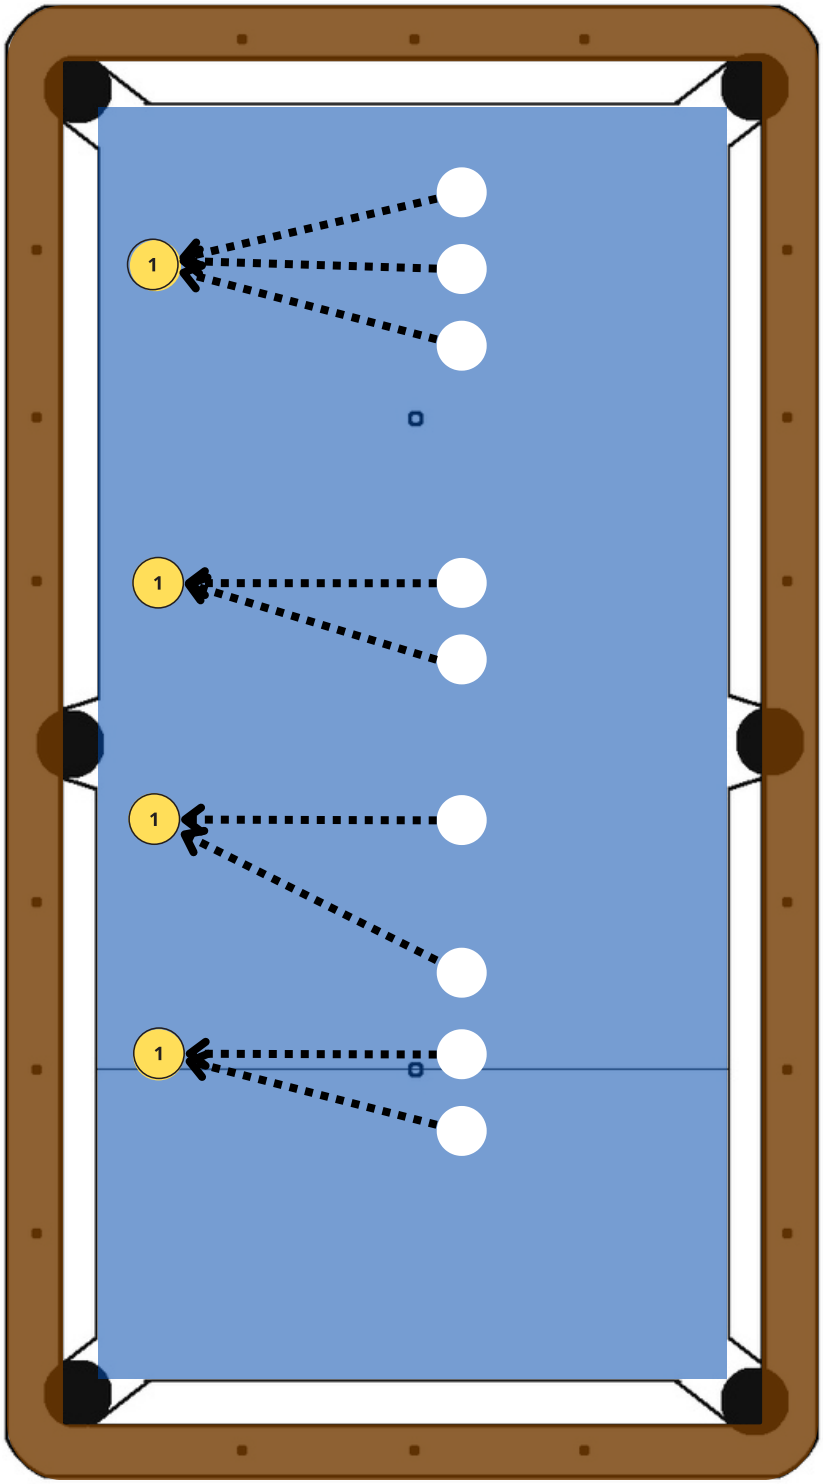
Start with no English and then change to upper, draw, left and right English. Shoot the ball to both sides. Keep score of 10 attempts for each variation.



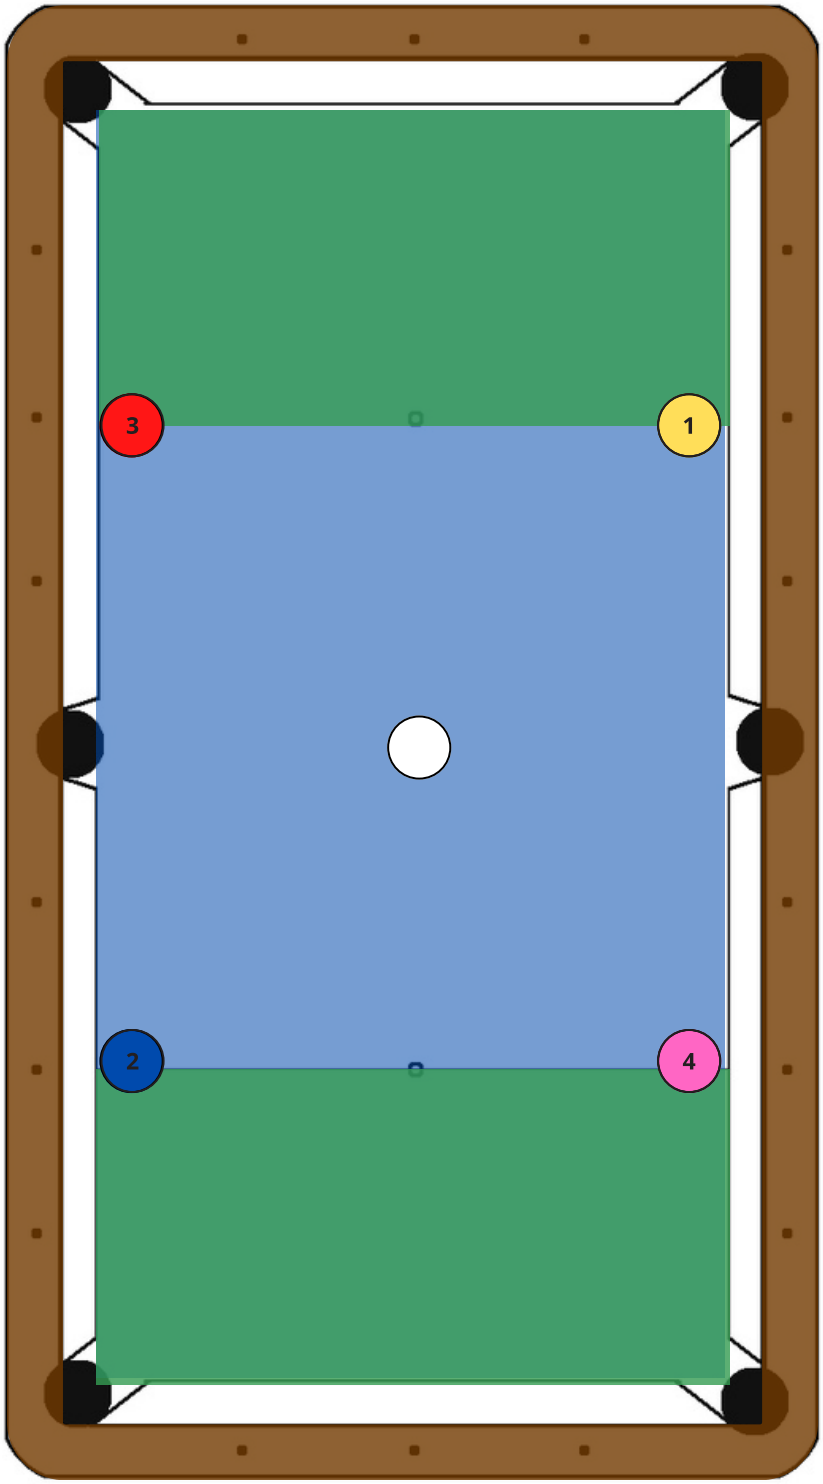
Try playing pocket speed, and medium speed. As you improve on just making the ball try to leave the cueball at one of the green zone each time. Shoot the ball from both sides. Keep score of 10 attempts for each variation.



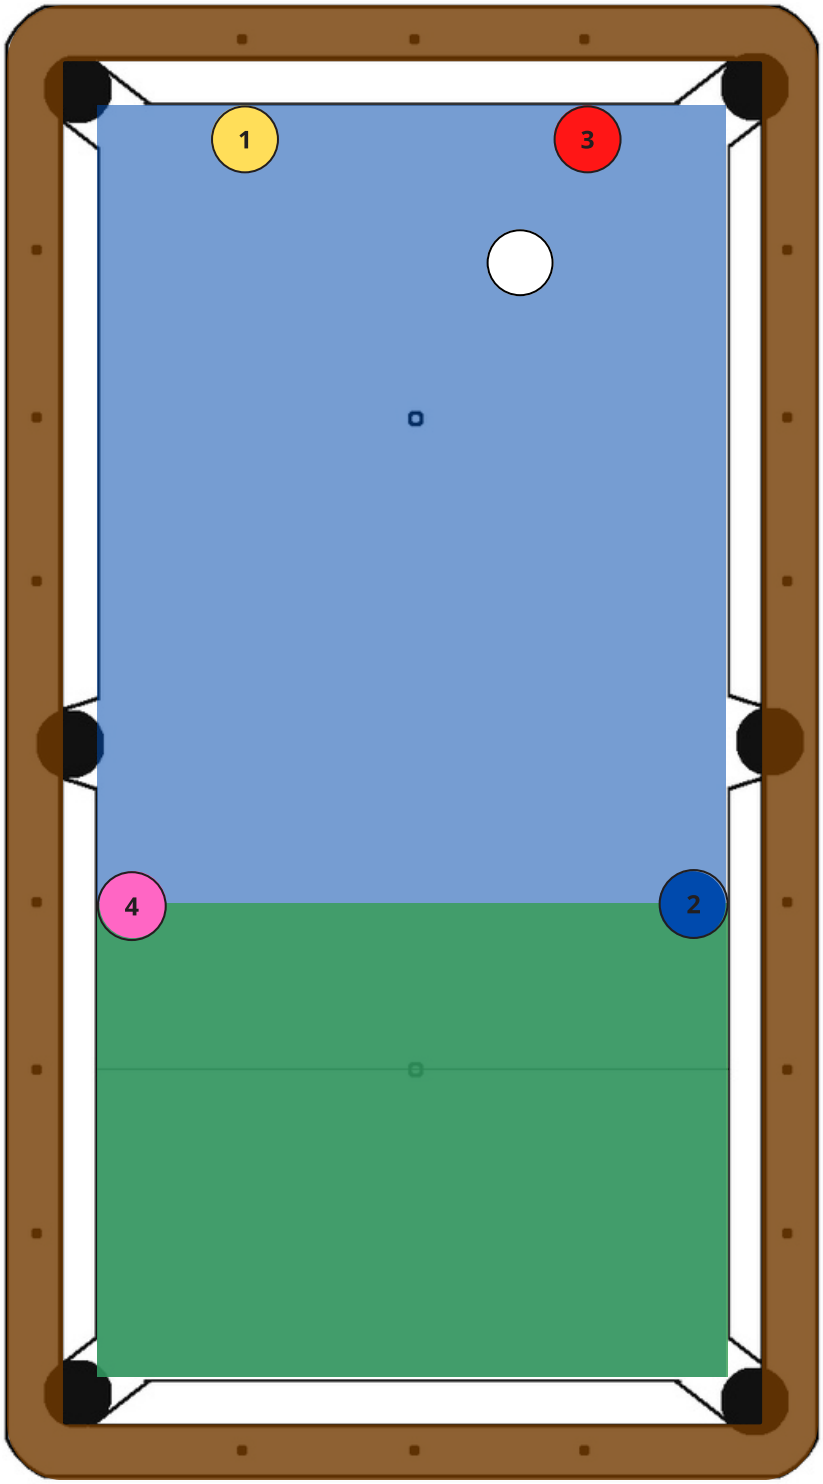
Shoot the 1 ball at the left corner pocket and try to position the cue ball in the green area. Start with one rail and left English and then with two and three rails and right English. Do the same from the opposite angle. Write down 10 attempts from each side. As you progress leave more distance betweeen the balls to make it harder.



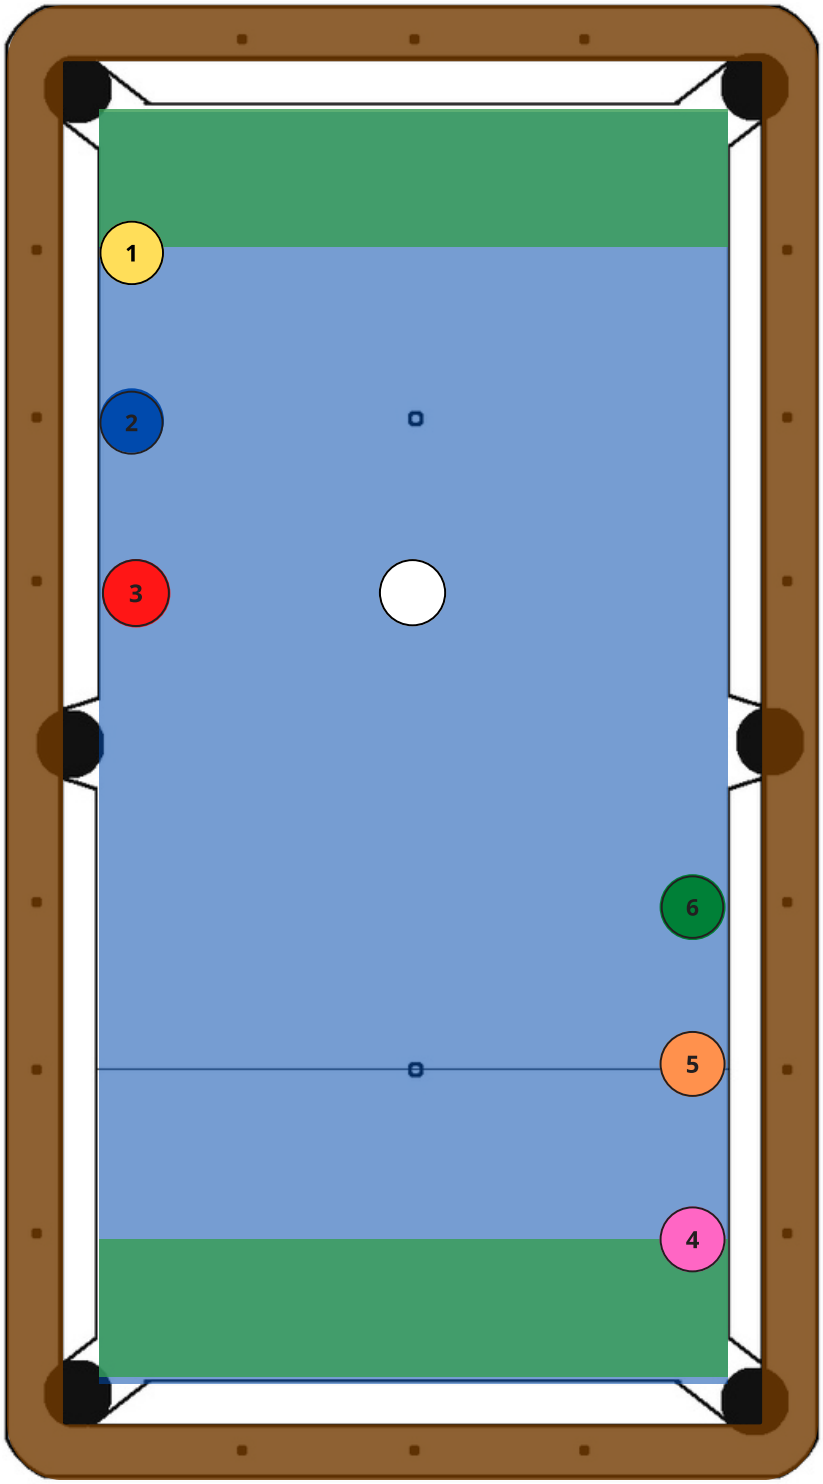
Banks: This is a practice for bank shots. The goal is to get familiar on playing banks and understand the different effects the ball gets with different spin. Try to make the 1st ball in the corner pocket and all the others to the side pocket. Use no spin at all at first then stop shot and experiment with left and right depending on the angle. * Use follow through and a rolling hit and also low spin and fast stroke. 10 attempts for each shot. Try the shots from both of the sides of the table.



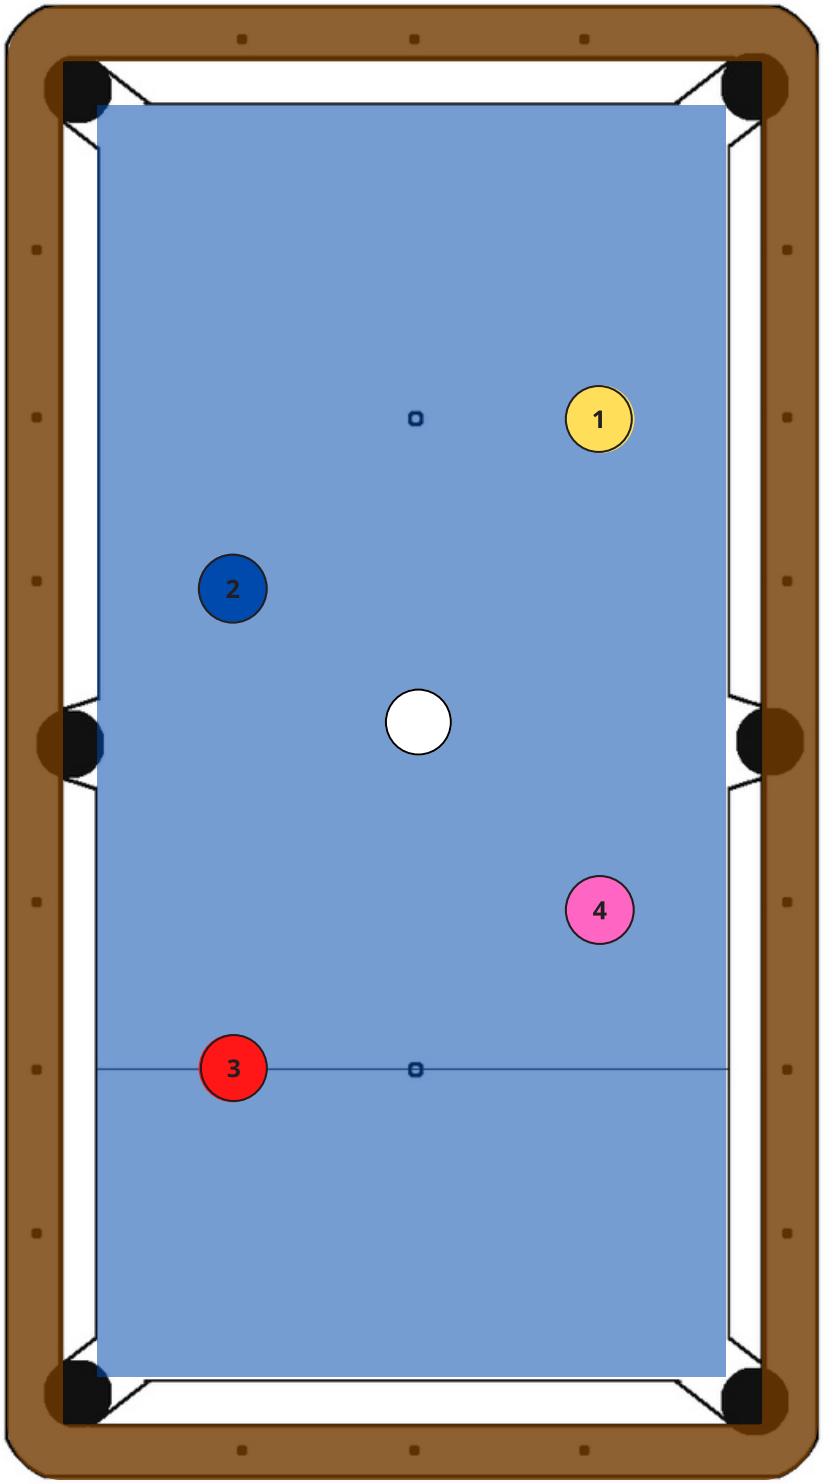
Cue ball must stay in
between the blue area.
No banks allowed. You can make the drill easier by putting the balls one diamond closer to the pocket or harder by bringing the on the 3rd diamond of the side rail.



Cue ball must stay in between the blue area. No banks allowed.

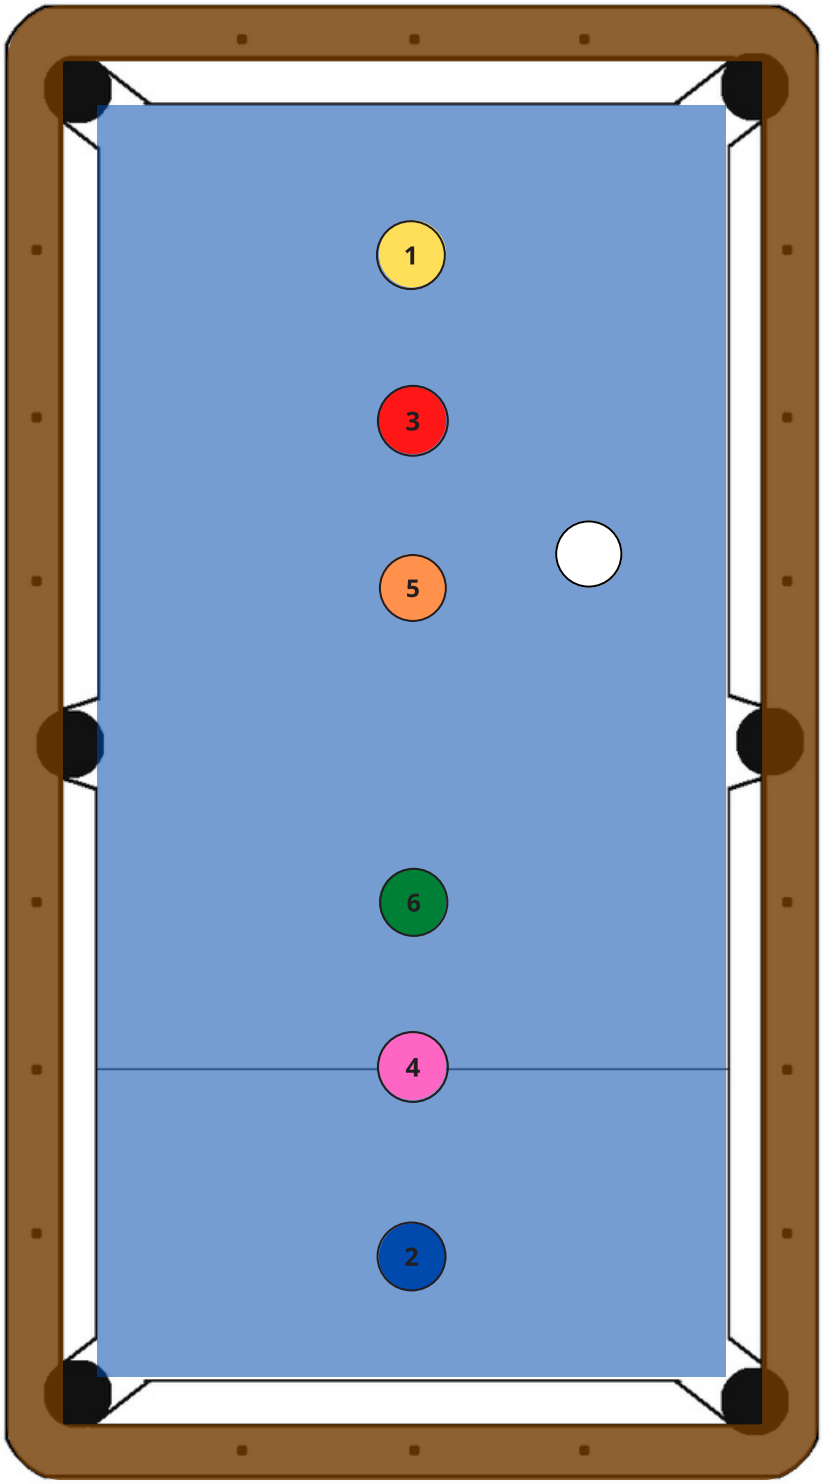


Cue ball must stay in
between the blue area.
No banks allowed. When you feel comfortable completing this drill you can experiment with positioning with two rails where you are allowed to pass through the green zone.



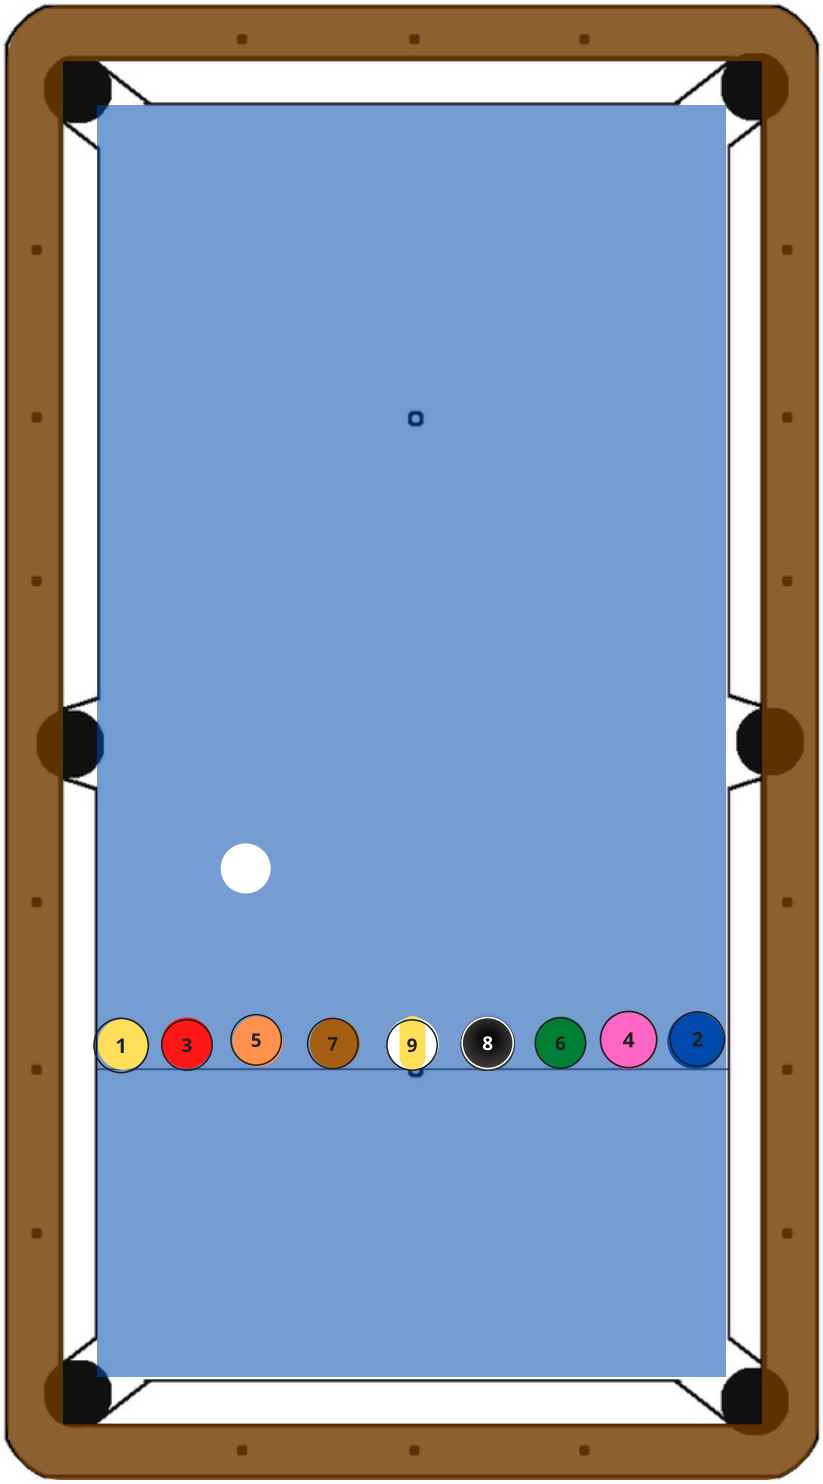
Balls must be pocketed on the corner pocket that are closer to.

No banks allowed.

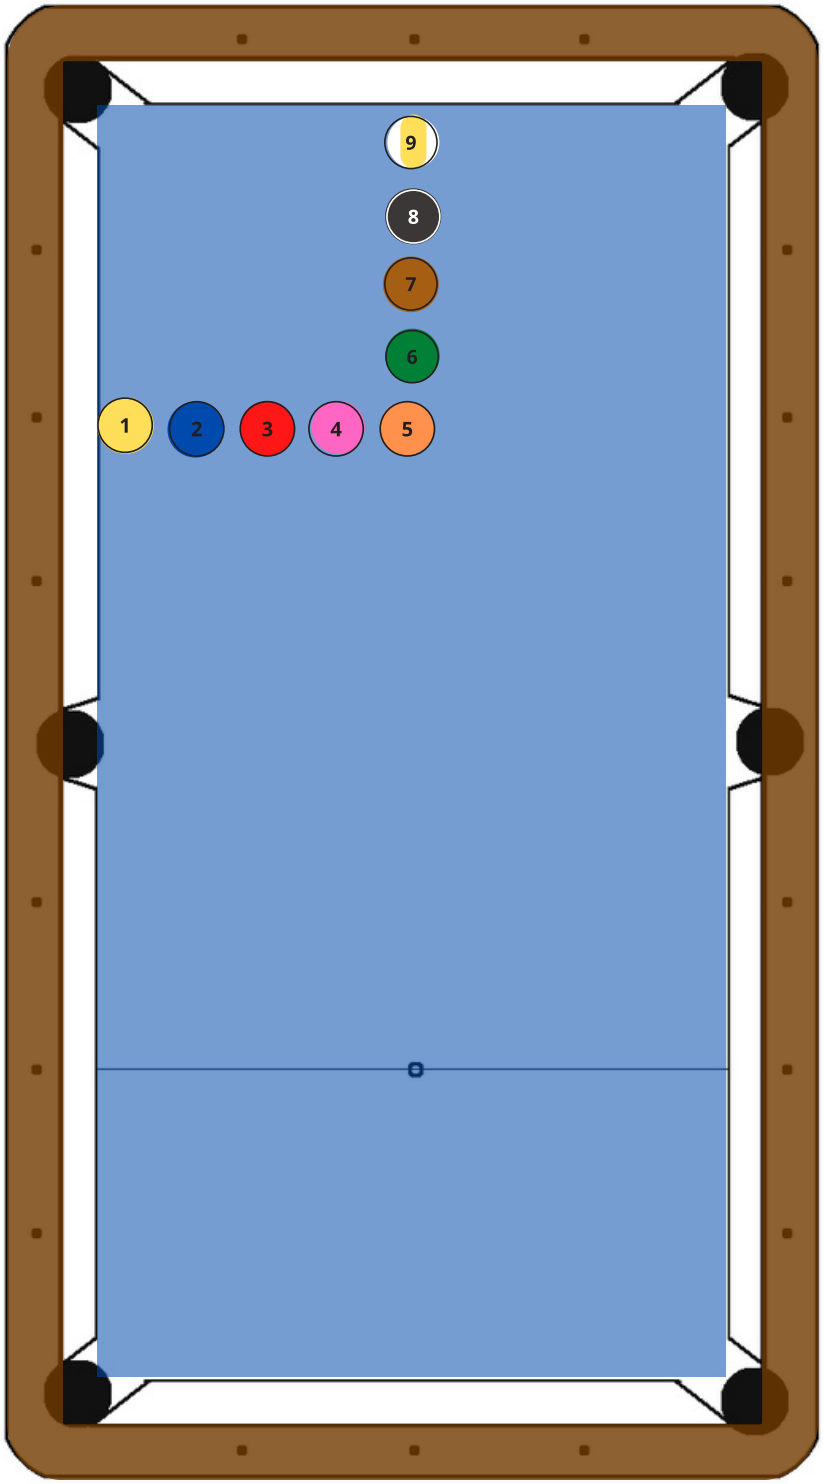


1.) Cue ball is allowed to touch two rails after each shot. No banks allowed.

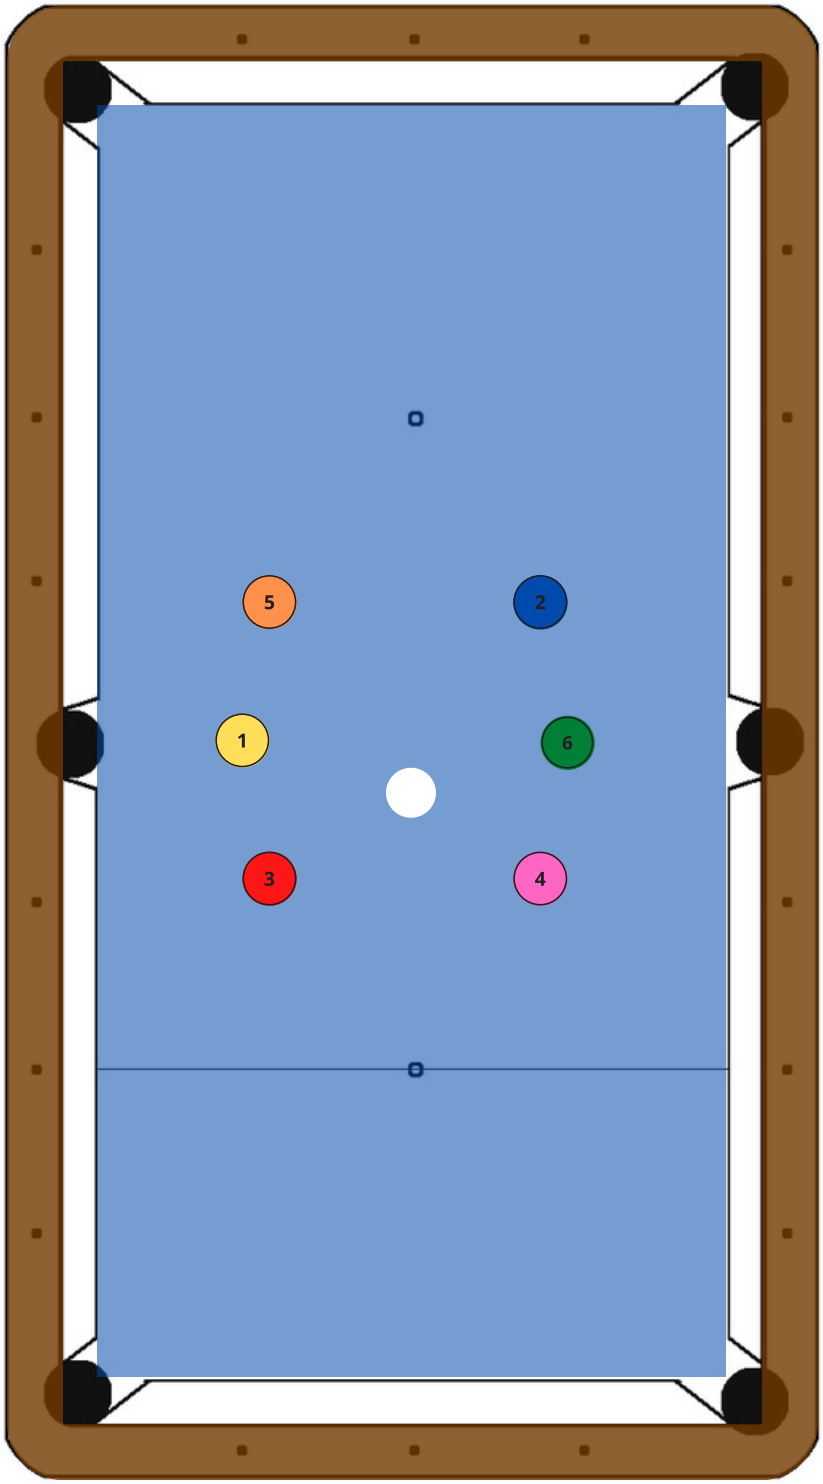
2.) Cue ball is allowed to touch one rails after each shot. No banks allowed.



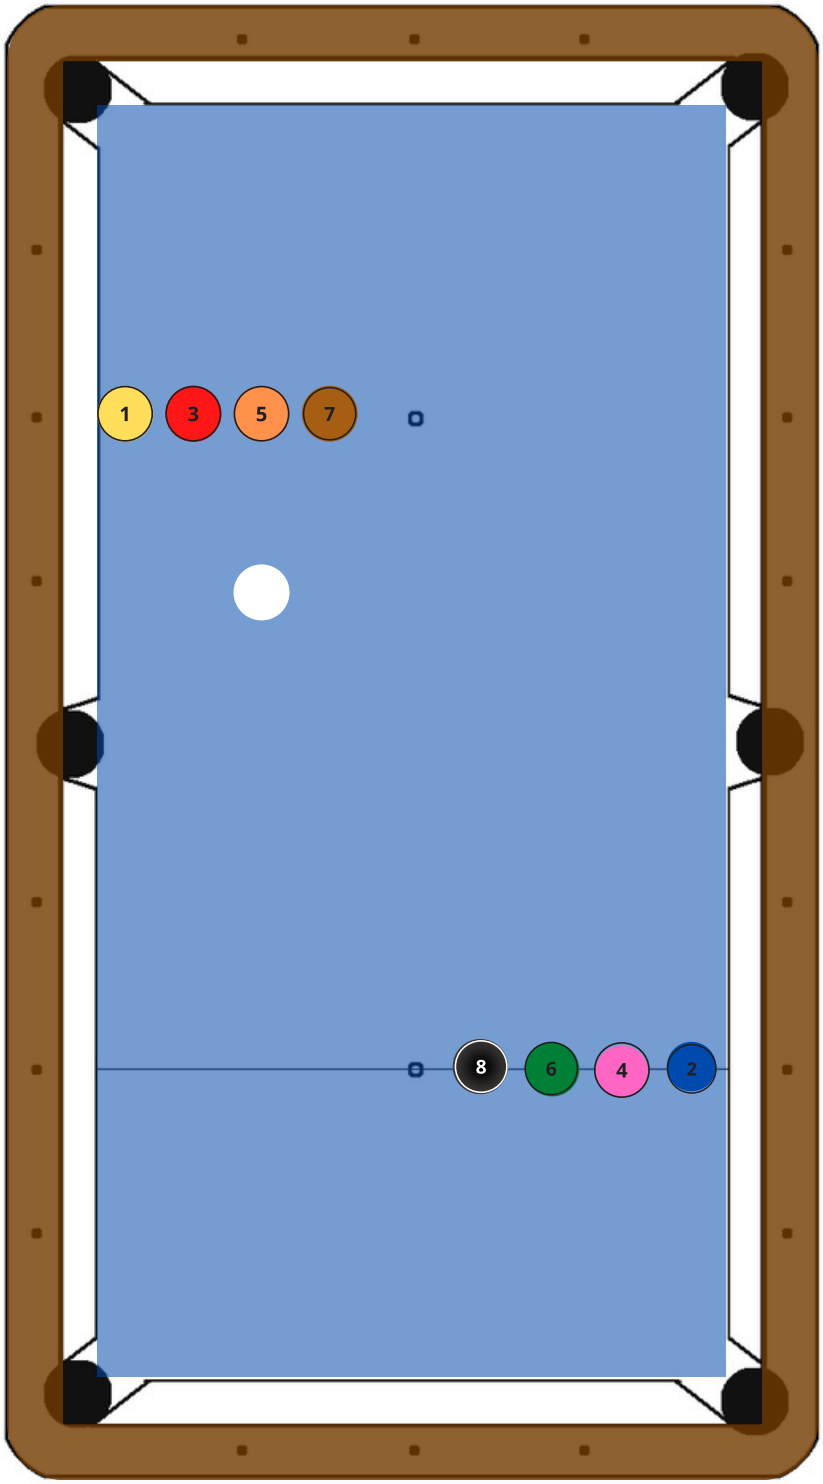
When you are trying this drill for the first time and especially if you are not that advanced yet, you can make the balls without following any order. As you improve follow the order and later on experiment by changing the order. All ball must be pocketed in the corner pockets.



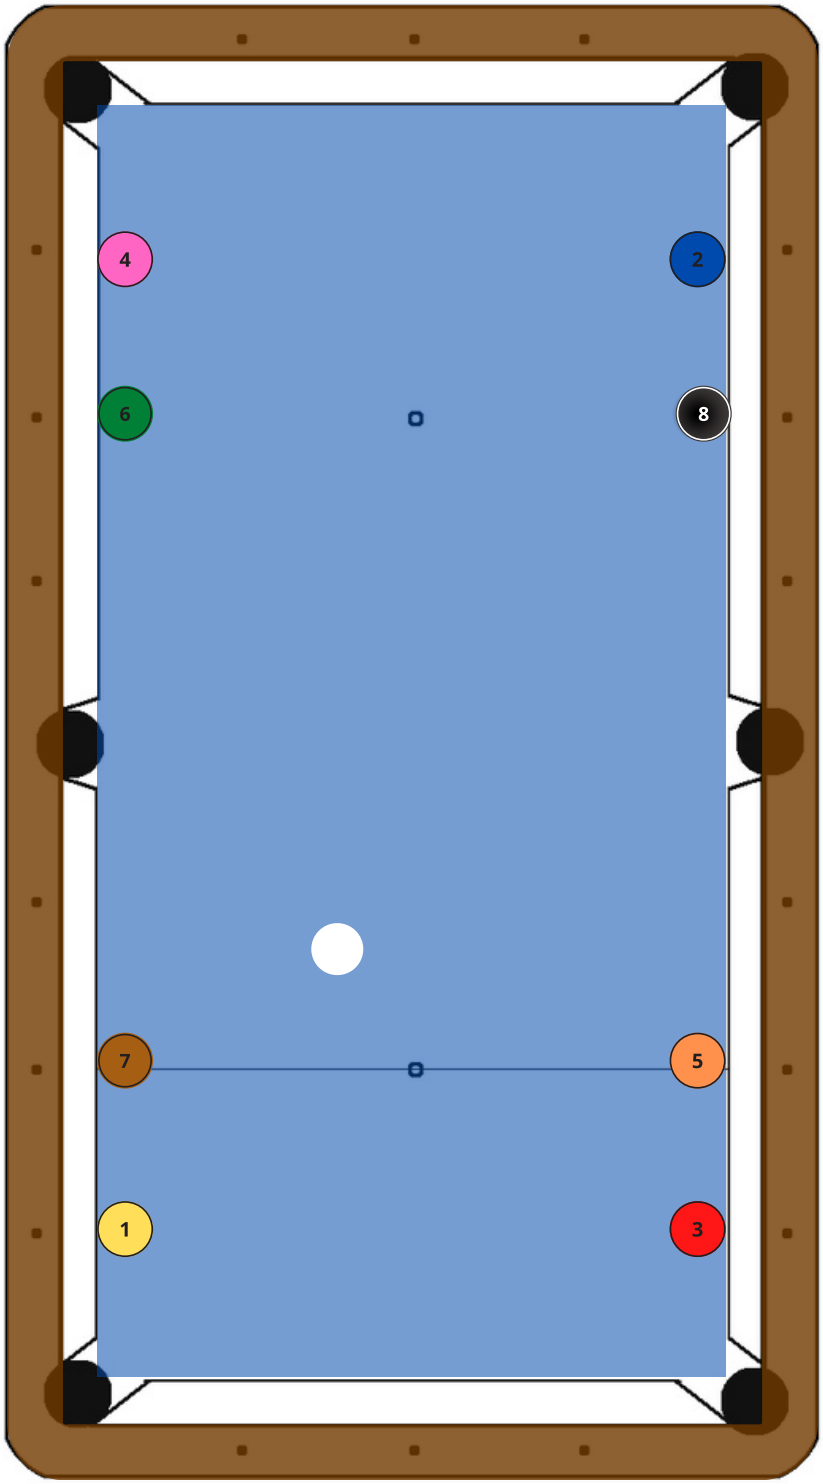
When you are trying this drill for the first time and especially if you are not that advanced yet, you can make the balls without following any order. As you improve follow the order and later on experiment by changing the order. All ball must be pocketed in the corner pocket.



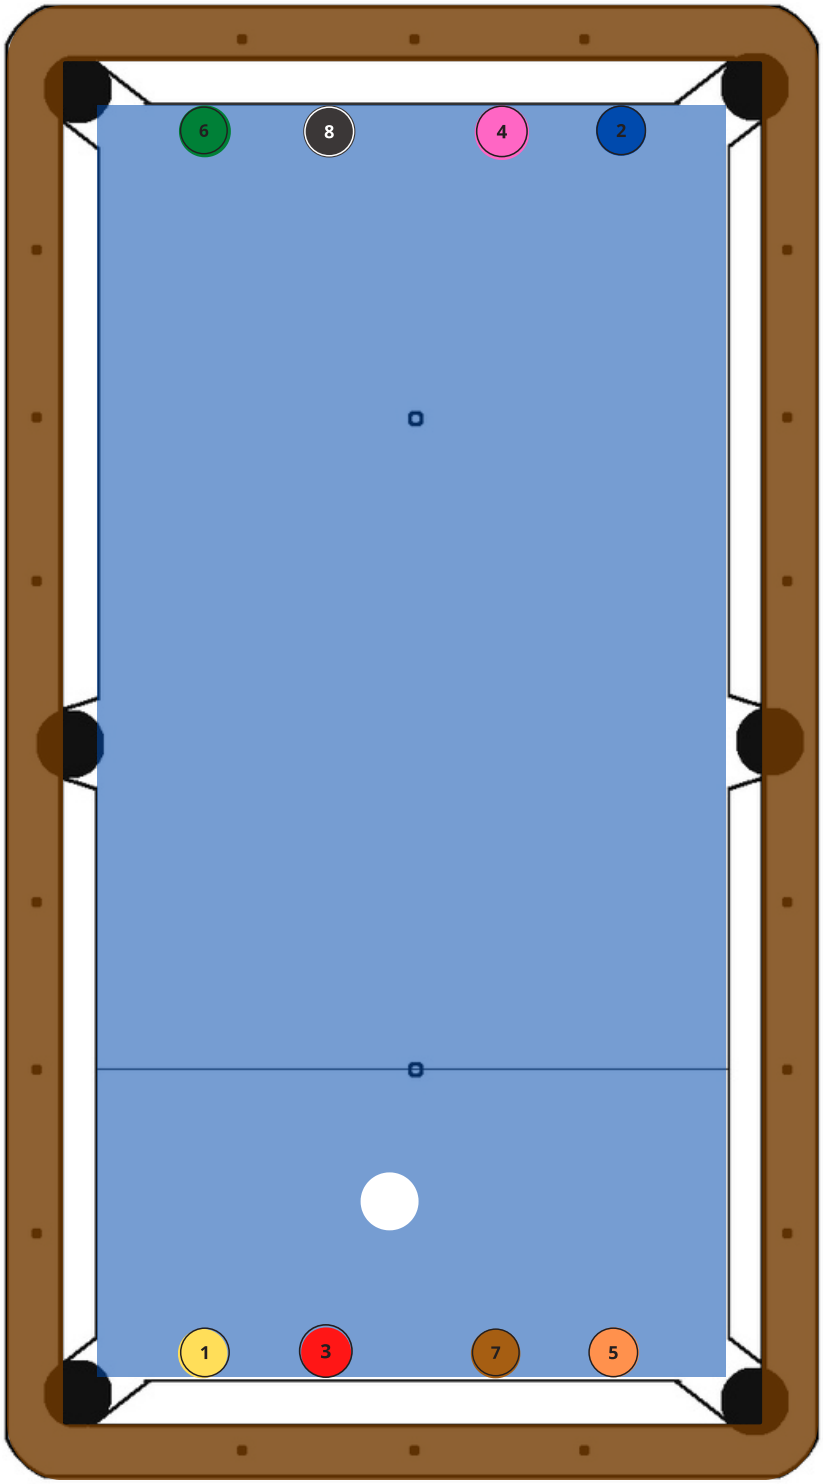
Balls 1,3,5 must be pocketed in the left side pocket and 2,4,6 on the right side pocket. You are not allowed to touch any ball other than the one shooting.



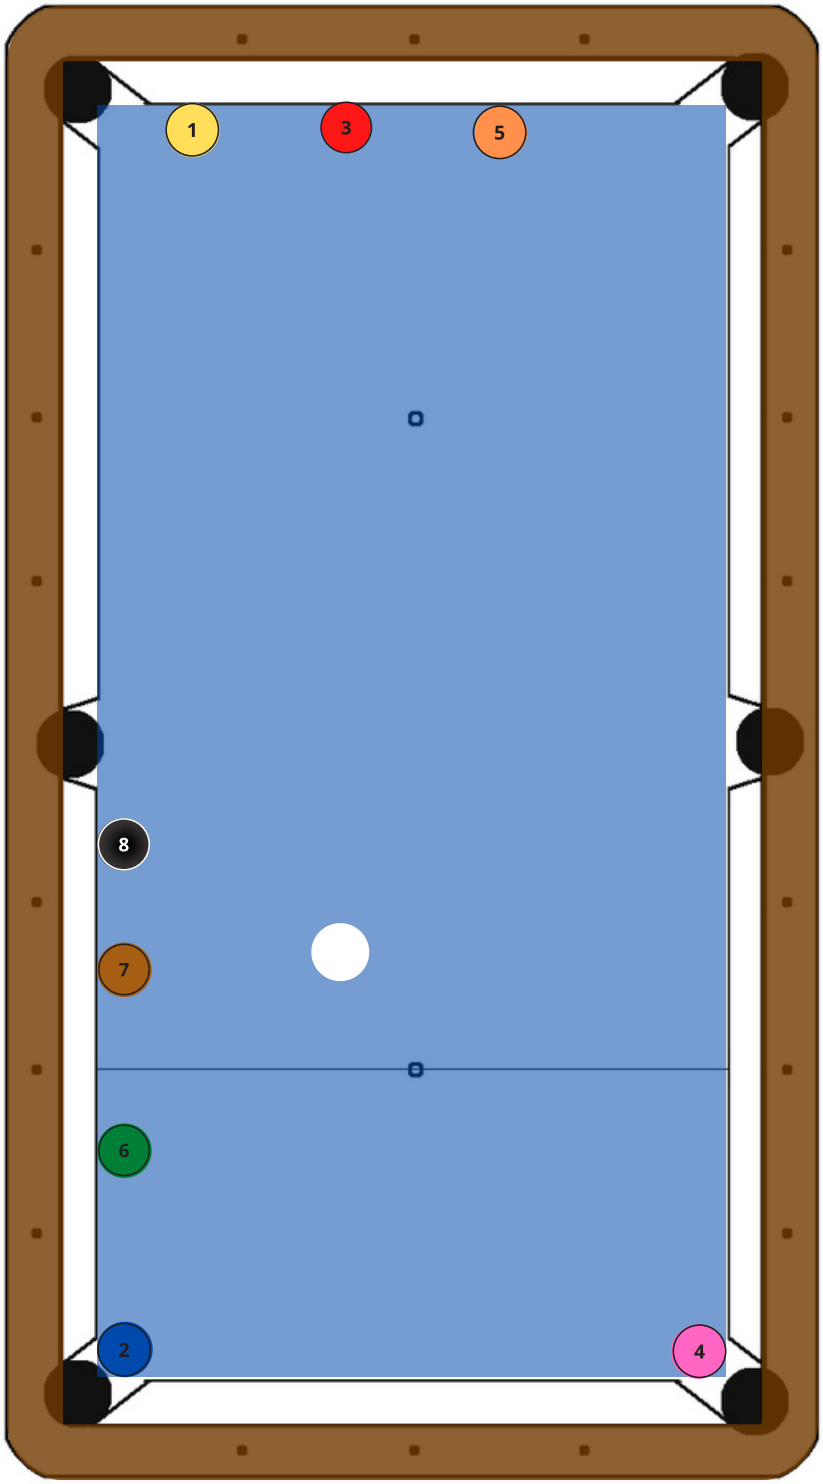
You are not allowed to touch any other ball except the one shooting. When you feel confortable making this drill, place the 9 in the middle of tha table and avoid touching it. No banks allowed ofcourse. (the balls should not be touching when you rack them)



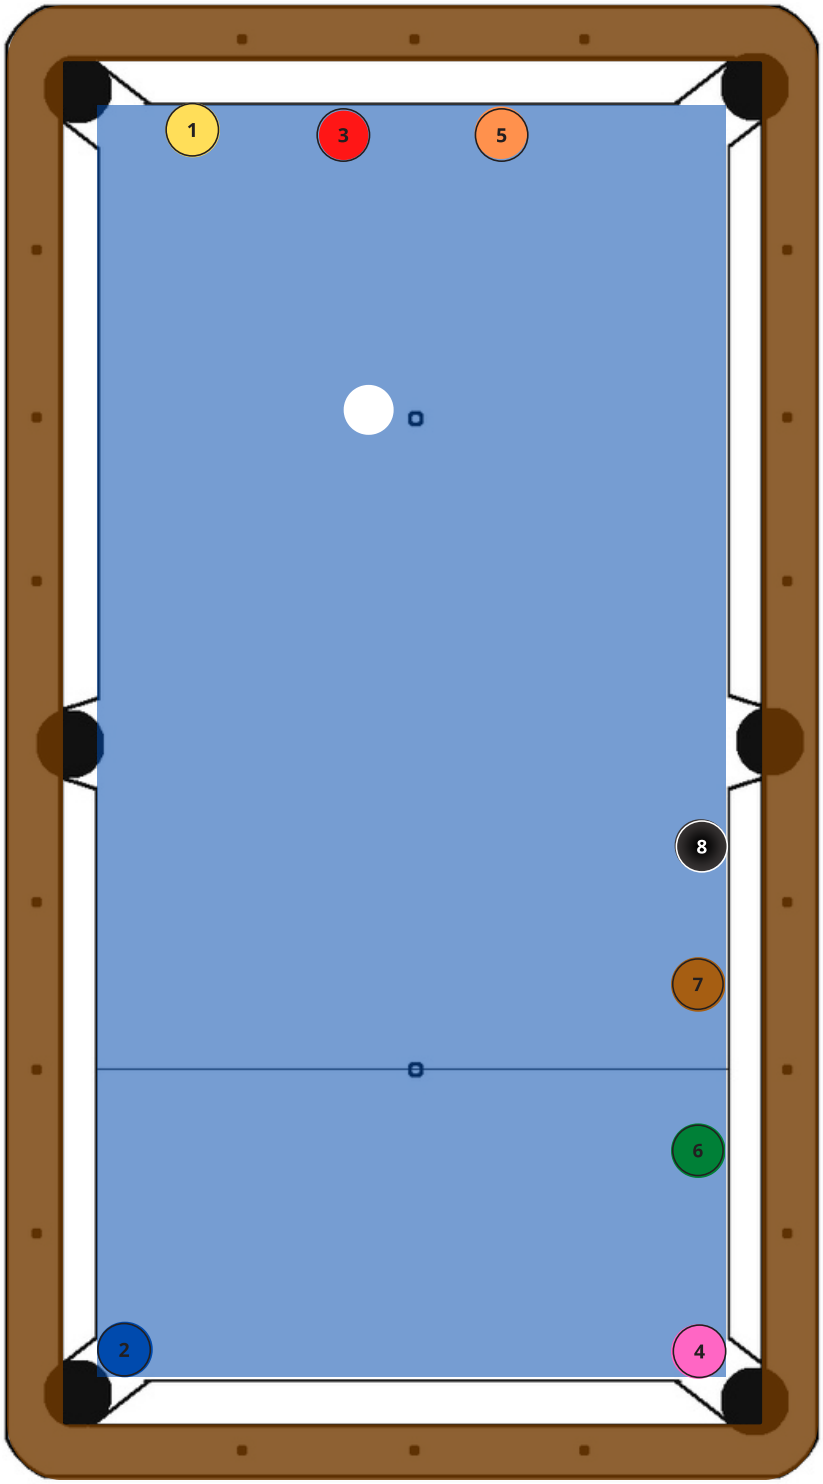
Shoot the balls in the order and be careful of the angles.



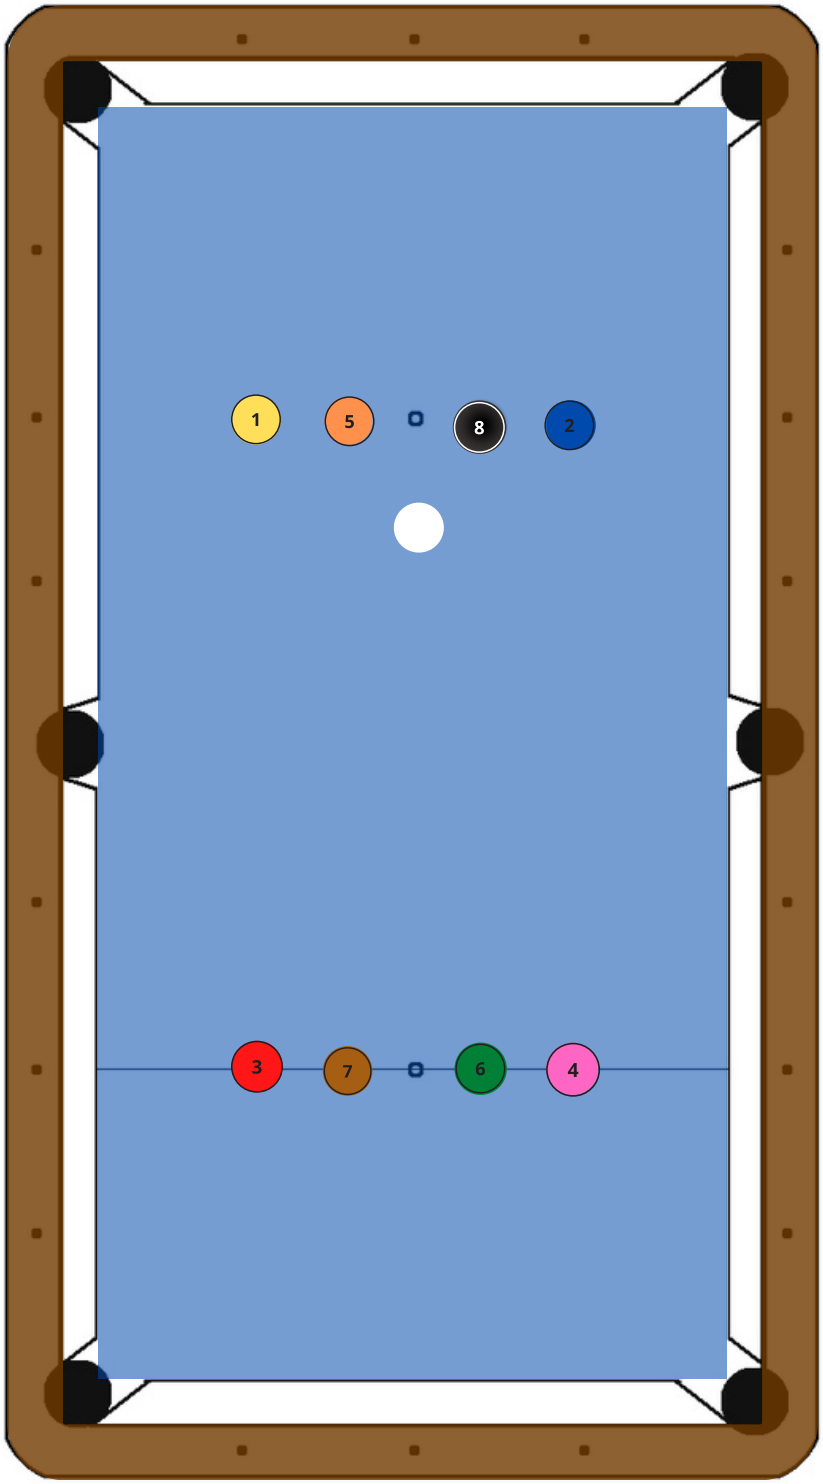
Shoot the balls in the order and be careful of the angles.



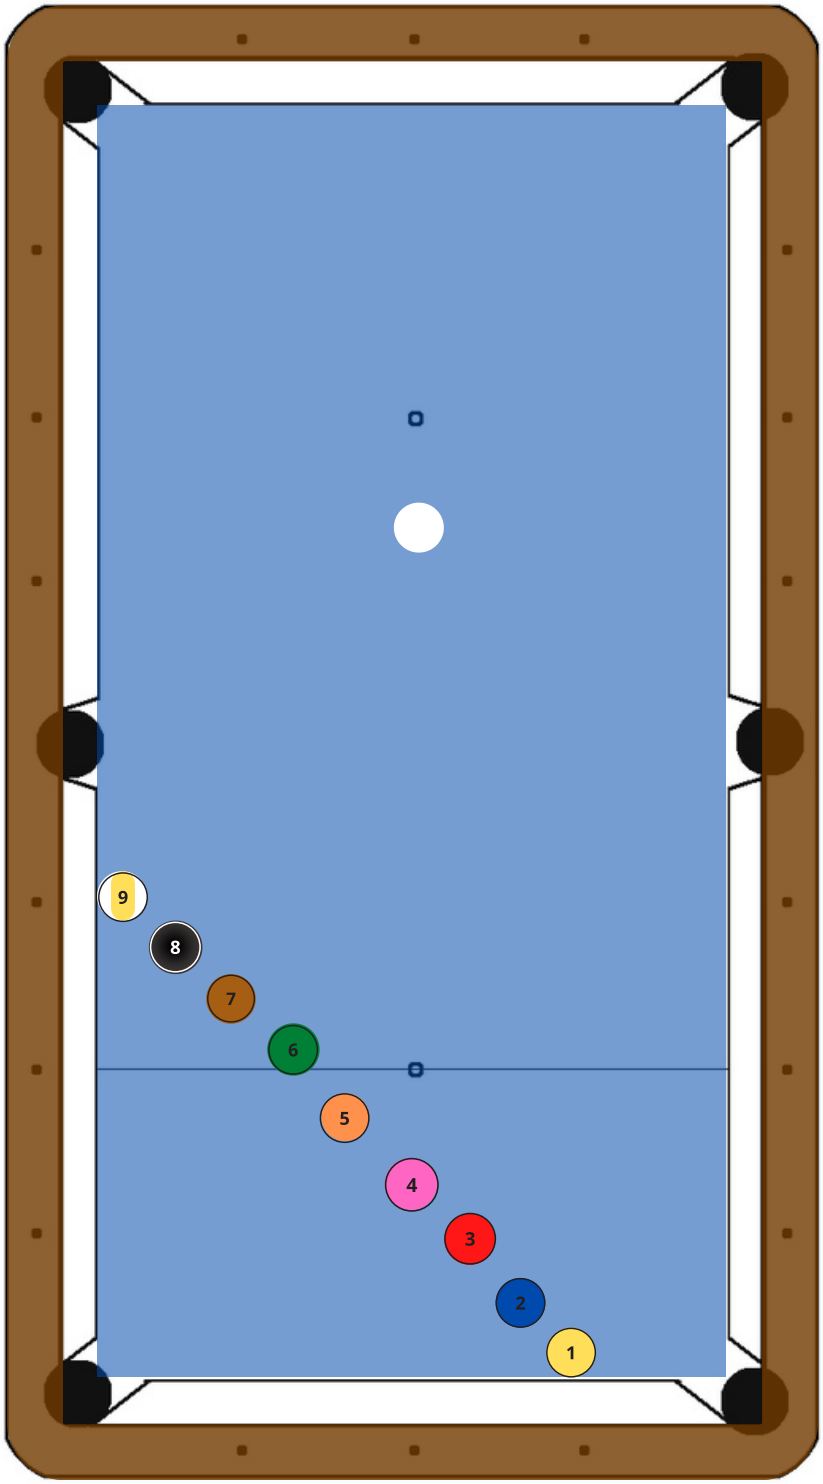
Shoot the balls in the order and be careful of the angles.



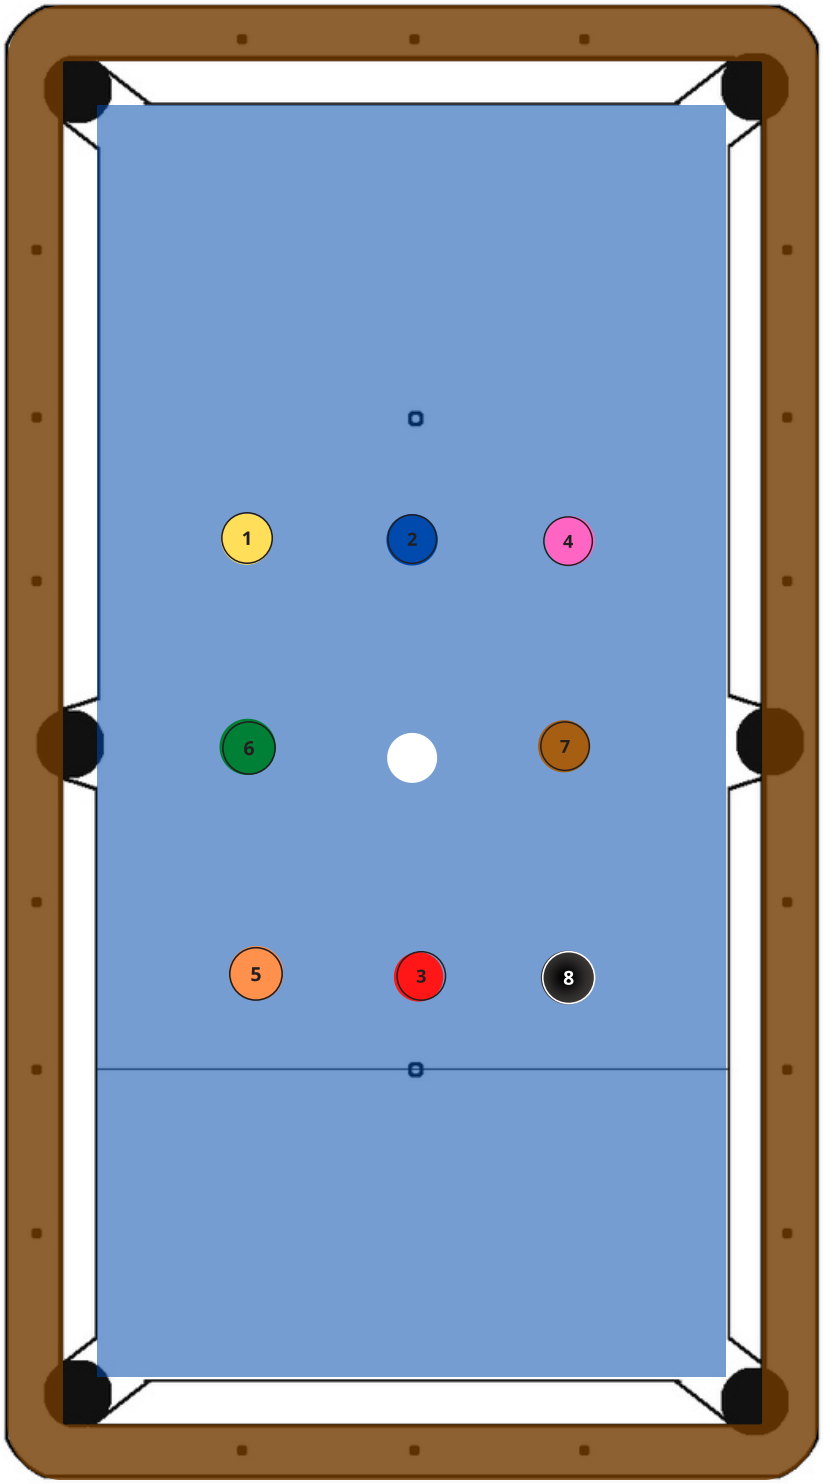
Shoot the balls in the order and be careful of the angles.



When you are trying this drill for the first time and especially if you are not that advanced yet, you can make the balls without following any order. As you improve follow the order and later on experiment by changing the order. All ball must be pocketed in the corner pockets.



When you are trying this drill for the first time and especially if you are not that advanced yet, you can make the balls without following any order. As you improve follow the order and later on experiment by changing the order. All ball must be pocketed in the corner pocket.



The goal is to make the balls without the cueball ever touching the rail or other ball ofcourse. You don't need to make the balls in order. You need to keep the angles short on each ball so the cueball don't travel much. As you improve you can put the balls closer to the rails for extra difficulty.
